

Look at the picture and choose a set of questions to answer. You could use counting objects to help you.

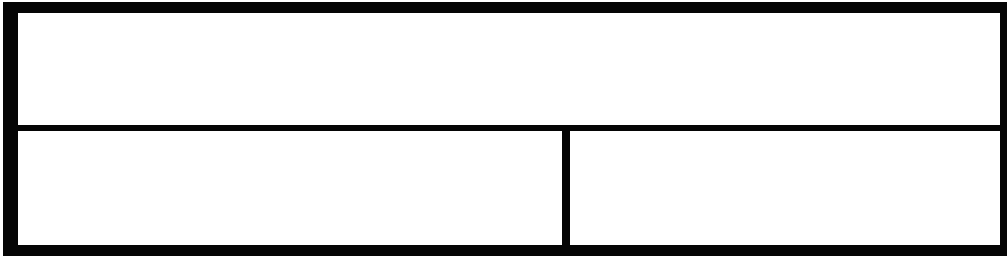

What is the whole number?

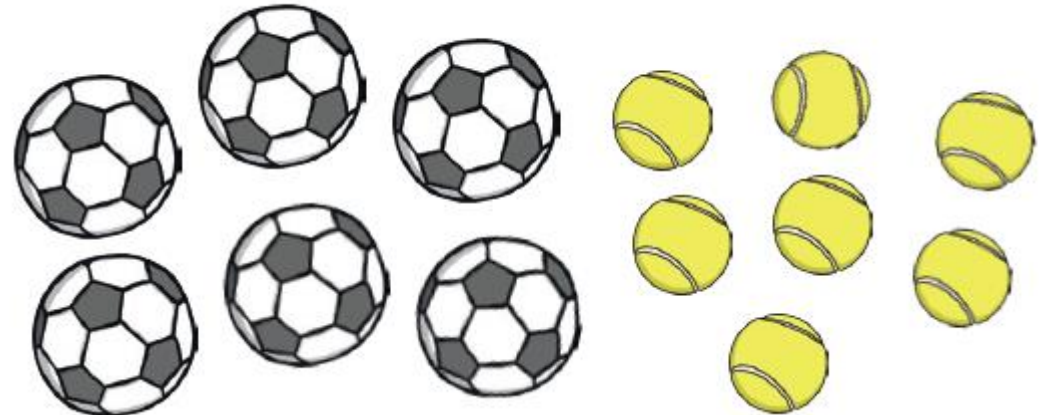

What could the parts of the whole number be?

Use the blank bar model to help you answer the questions.  
Remember the whole is how many there are all together.

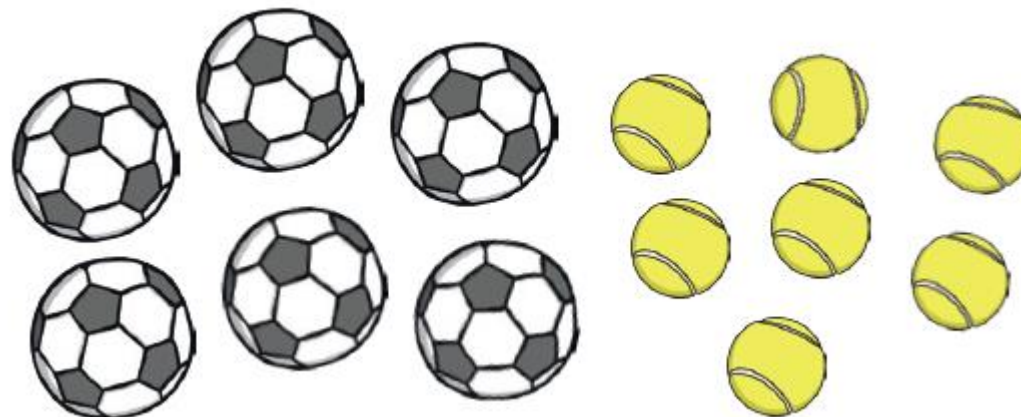

Use your part whole to write as many number sentences as you can.

<input type="text"/>	+	<input type="text"/>	=	<input type="text"/>
<input type="text"/>	+	<input type="text"/>	=	<input type="text"/>
<input type="text"/>	-	<input type="text"/>	=	<input type="text"/>
<input type="text"/>	-	<input type="text"/>	=	<input type="text"/>

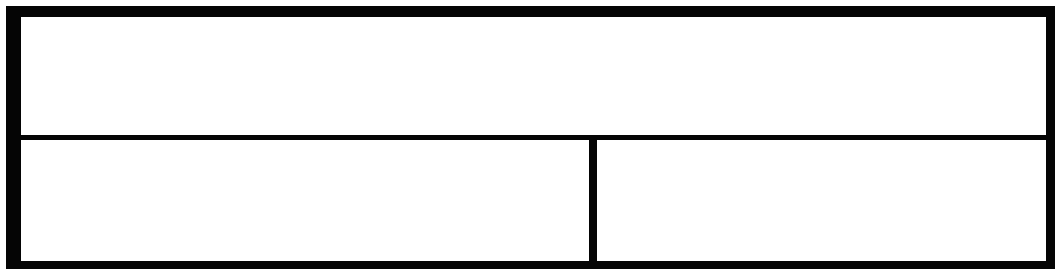

Spicy 

What is the whole number?

What could the parts of the whole number be?

Complete the bar model. Remember the longest bar is the whole and the other bars show the parts.

Now write 8 different number sentences using this bar model. Remember you can put the equals at the beginning or the end.

Hot

Complete the bar model, remember the longest bar is the whole and the other bars show the parts.

Now, write 8 different calculations and draw a part-whole model about this picture. Make a mistake on purpose! Can your partner spot and correct the mistake you have made?
