L.O – To represent 10 on a ten frame

Build a wall using large bricks, boxes or cushions. Line up 10 water bottles on top.

Sing the song from Monday again. Ask your child to take one bottle off as you sing each verse, laying it on the floor under where it stood.

Reinforce the number bond to 10 each time e.g 8 and 2 is 10.

Watch the video sharing different ways to represent 10 on a ten frame.

<https://www.barnett-wood.surrey.sch.uk/index.php?section=43&page=689>

Can you find all the different ways to show 10 on your ten frame using 2 different colours of counter.

How many counters are there in the 10 frame (without counting)?

How many counters in the top row? How many in the bottom row?

How many altogether?

Can you find all the various ways of showing 10 on the ten frame using two colours of counters?

Parent check: Discuss how 4 and 6 is the same as 6 and 4. Both total 10
