Reception

Additional Home Learning Activity Ideas WB 22.02.21

This week our topic is 'Signs of Spring'

Spring flowers still life painting

You could use water colours or poster paint for this activity. You could set up your painting outside or inside with the vase of spring flowers in front of you. Look carefully at the shapes and colours.

Nest building

Birds are busy building nests in the spring to lay eggs in. Can you build a nest for a bird? There are some ideas below of the materials you could use

Why do we need to give plants and flowers water?

Drop lots of food colouring into half a glass of water and add a cut white carnation. Investigate what happens to the water. What happens if you slice one stem up the middle and place one half in 2 different colours? Talk about what you notice.

Have a look in your book collection at home. Do you have any story or information books about Spring? Spend some time looking at the pictures and making up your own story based on what you see happening before reading them with a grown up or sibling.

Planting

Spring is a good time to get planting vegetables. You may like to buy some seeds and grow some vegetables of your own. What will your seeds need to help them grow?

Blossom trees

Paint or draw a trunk for your blossom tree.

You can then add pink and white blossom to your tree. You may like to use scrunched up tissue paper, print with different materials (bubble wrap, cotton buds, your fingers! Etc)
