## Maths

L.o- To use the part-whole model to break 10 into 2 parts

Watch the teaching video below. Your child will need the blank part-whole and 2 sets of objects to use as counters. You will need 8 of one and 12 of the other.

Name: \_\_\_\_\_

26.02.21

Can you show number bonds to 10 in the part-whole models below?

Remember, 10 is always the whole. You can use sets of objects to help you first and then draw them into the model to show us.

We would like you to submit this piece of learning on tapestr
