

## Money

This week we are looking at coins and their value. Start by collecting together the different coins in your house (these can be real or pretend) do you know the value of each coin? You could put the coin under a page of your Maths book and make a coin rubbing, then write the value next to it. Now put them in to groups, you can sort them however you like e.g. silver coins and not silver coins. If you don't have lots of coins at home, there are pictures you can cut out and use underneath, or make your own.

There are also lots of Education City games saved under Money Week 3 when you use your log in. Well done to those of you who have been using Education City already so far.

P.S. Here is a fun game to practise some of the skills you learnt last week, choose the multiplication and division section then bronze level. <https://www.bbc.co.uk/bitesize/topics/zjkphbk/articles/zf4sscw>

Silver coins

not silver coins
