

Money – Supermarket Sweep!

Today you need to make your own shop! Choose 7/8 objects in your home and make price tags for them. Then take it in turns with a member of your family to be the shop keeper and the customer. Start by buying one item and counting out the exact money (you could use one coin or multiple coins to make the amount). Then when you feel confident buy 2 or 3 items from your shop and work out the total. You could use the table below to help you price the items, start with **Bronze** and work your way up.

Bronze	Price labels match coin value (coins up to 10p)
Silver	Price labels match coin value (coins up to 50p)
Gold	Price labels are a mix of numbers less than £1

10p coin

$$1p + 2p + 2p = 5p$$

50p coin
