Solving doubles using tens frames

We have used tens frames at school to solve addition problems before.

We are going to use them to solve doubles problems.

Choose one of the chilli challenges below for this activity:

 Mild	Finding doubles up to 3 using number cards. You can use the ones from your doubles machine. You will only need to use 1 tens frame and have 2 different sets of small objects.
 Spicy	Finding doubles up to 6 using a dice or number cards. Explain the double to a member of the family e.g. “double is...” or record your findings in your own way, this could be pictures. You will need to use 2 tens frames and 2 different sets of objects.
 Hot	Finding doubles up to 10 using number cards and record what you find as a number sentence. You will need to use 2 tens frames and 2 different sets of objects.

For guidance on how to find the double of a number using a tens frame, watch the tutorial video by following this link.

<https://www.youtube.com/watch?v=1ZxaMofj8J0>

You can use the doubles frames below or make your own.
