

Comparing coins

7.5.20

Repeat the activity from yesterday (use the table below to challenge yourself, start with **Bronze** and work your way up). Close your eyes and pick out 2 coins and add them together. How much money do you have in your hand?

Bronze	coins up to 10p
Silver	coins up to 50p
Gold	All coins

Write down your number sentence for the first 2 coins and then pick out 2 more and write another number sentence. You now need to work out which number is the largest. Use the < greater than and > less than symbols to show the biggest number. Here is a clip to show you how to set out your work.

<https://www.youtube.com/watch?v=Bt537nsSzkE> Repeat this activity at least 5 times, what was the smallest amount? What was the biggest amount of money you made?

$$50p + 10p = 60p$$

$$2p + 1p = 3p$$

$$60p > 3p$$
