

## Halves and Quarters

11<sup>th</sup> May 2020

For this week's Maths we are looking at halves and quarters. Remember that when you cut something in to halves or quarters all the pieces need to be the same size. Help out with the food preparation at home, you could have toast for breakfast and cut the slices in to quarters or you could make sandwiches for a picnic in the garden and cut them in half. How many different ways can you cut it in half or quarter? If you can't help with the food preparation you could use a piece of paper. There are also some games saved on Education City under Halves and Quarters week 4.

Toasted sandwich cut in half

Toast cut in quarters

Has this water melon been cut in to halves or quarters? How do you know?
