

Solid shape matching

L.o. To match everyday objects to their solid shapes. To use mathematical vocabulary to describe the properties of the objects that have been sorted.

Cut out the objects and sort them according to their matching 3D shape. Explain to an adult how you know the objects match e.g. These are all cubes because they have 6 square faces. Adults, please annotate your child's explanation in each box.

sphere

These are spheres because _____

cube

These are cubes because _____

cuboid

These are cuboids because _____

cone

These are cones because _____
