

## Multiplying Money

Below are two different sets of word problems. Choose the one you feel gives you a challenge or try some from each page.

Write the number sentence and solve the problem.

Here is an example for you.

There are three 10p coins  
in my purse.

How much have I got?

$$3 \times 10p = 30p$$

Remember you can use  
jottings, arrays and your  
times-table knowledge

There are five 10p coins in  
my purse.

How much have I got?

There are six 5p coins in  
my purse.

How much have I got?

There are ten 2p coins in  
my purse.

How much have I got?

Which purse has more?

Blue, which has four 5p  
coins

or

Red, which has eight 2p  
coins.

There are nine 2p coins in my purse and three 10p coins

How much have I got?

There are five 20p coins in my purse.

How much have I got?

There are four 20p coins in my purse and three 10p coins.
