

Friday 15th May 2020

Today's learning is linked to Science.

Watch this 'BBC bitesize' clip about food chains.

<https://www.bbc.co.uk/bitesize/clips/z96r82p>

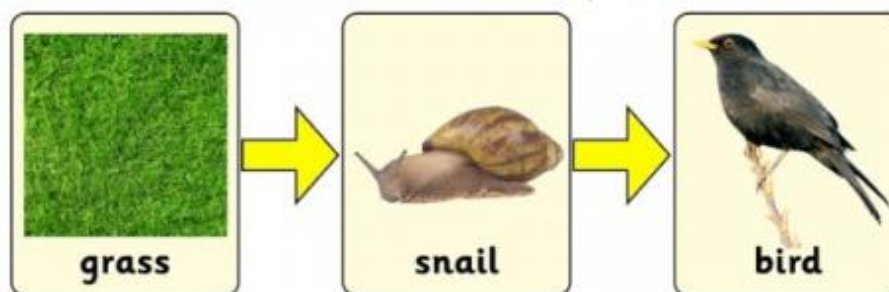

Now play this game:

<https://www.sheppardsoftware.com/content/animals/kidscorner/games/foodchaingame.htm>

Finally, we'd like you to draw and label your own food chain.

It might look something like this:

The grass grows because it gets its' food (nutrients) from the soil, water (rain) and sunlight.	The snail eats the grass.	The bird eats the snail.
---	---------------------------	--------------------------

You might like to create more than one food chain.

You could draw your own pictures or print some off.
