### Finding half of an amount

Today we are going to continue our learning about halving. We are going to use number cards and small objects to help us find half of a number.

	Finding half of numbers to 10. Even numbers only. You will need number cards, the finding half model on the next page and 10 small objects.
	Finding half of numbers to 20. Even numbers only. You will need number cards, the finding half model on the next page and 20 small objects
	Finding half of numbers to 20, even numbers. You will need number cards to 20, the finding half model and 20 small objects. Record your findings. E.g. half of 2 is 1. Challenge 1- Make extra number cards 21-30, find half. Challenge 2- What can you do if you have an odd number of objects, what would half be?

Watch the following tutorial to understand how to find half of a number/amount.

[https://www.youtube.com/watch?v=P-VcpPNt\\_jU](https://www.youtube.com/watch?v=P-VcpPNt_jU)

1. Turn your number cards over so you cannot see them.
2. Pick one number card and place it in the large box.
3. Get the matching number of objects for the number card you chose
4. Share the objects between the 2 smaller boxes. Check they both have the same amount in. One box represents half.
