

Quarters

21st May 2020

For today's Maths activity you will need the number cards you made on Monday. Then choose a number card and count out that many of an object in your home, you could use lego, sweets or raisins (anything you have lots of). Then share out that number of objects into 4 groups. Make sure each group has the same number to make it fair. Repeat this activity at least 5 times. What do you notice about the numbers you've shared out? Is there a difference between sharing odd and even numbers?

Here is a video to help you <https://www.youtube.com/watch?v=ye4OqZNPwS8>

How many marshmallows were in each group? Complete the sentence...

I have 8 marshmallows a $\frac{1}{4}$ of 8 is ...
