

## Maths Task 1

**If you are continuing with learning from home please complete this activity.**

We will be doing this activity in school this week, so no need to complete before your sessions at school.

We will be learning how to share this week and linking it to our topic work on minibeasts. Each child will need number cards and some minibeasts – you may wish to cut out the bugs below or use small counters (Unifix cubes, raisins or grapes will work equally well!) to act as the bugs. Children will be sharing the bugs equally between the leaves.

 <p>Mild</p>	<p>You will need a number card for each <i>even</i> number from 2 to 10. Mix up the cards and encourage your child to pick one up, count out that number of 'bugs' and share them equally between the two leaves.</p>
 <p>Spicy</p>	<p>You will need a number card for each <i>even</i> number from 2 to 20. Mix up the cards and encourage your child to pick one up, count out that number of 'bugs' and share them equally between the two leaves.</p>
 <p>Hot</p>	<p>You will need a number card for each number up to 20. Mix up the cards and encourage your child to pick one up, count out that number of 'bugs' and share them equally between the two leaves. If they pick up an odd number, let them discover that it cannot be shared equally by 2.</p>
