

Today you are going to count money to solve problems. You can answer the questions in your book. You can write calculations or draw simple coins like this:

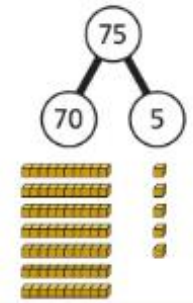

Showing equal amounts of money 2

- 1 a) Find the right money for each child to get an ice cream.
- b) Think of another way to make 65p.

Paul and Gemma both want a soft drink. Make 75p for each of them.

Remember you can only use
the coins we have in our
currency.

Everybody bought a can of drink for 80p.

Find four different ways to make 80p.
