

This week you will be learning more about money.

To begin with you will be doing counting of coins and notes.

You could ask your parents if they have any notes and coins for you to count.

1 Count the money.

Remember that it doesn't matter where the equals sign is as long as either side of the calculation makes the same amount.

2 Count the money.

You know how to count in 10, 5, 2 and 1. You can do it here.

3 Use <, > or = to compare the money.

4 Count the money.

5 Match the money to the correct total.
Which is the odd one out and why?

£25

£60

£10
