2D and 3D shape – patterns

Today we are looking at patterns using the 2D and 3D shapes.

Look at this repeating pattern, what shape have I used? What shape comes next in my pattern? Can you draw it in?

Can you make your own repeating pattern? You could use 2D and 3D shapes, ask a grown up to help you use a ruler or draw round objects to make your shapes.

Are these two shapes the same? How do you know?

Challenge

1 a) Which rocket has broken?

b) Which of these shapes were not used?
