

Read carefully and follow the instructions.

The first one could be  $9 + 1 + 2 = 12$

Now work out 9 more ways.

You can only use each card once in a number sentence.

### Card sharp

Take ten cards numbered 0 to 9.

1. Pick three cards with a total of 12.  
You can do it in 10 different ways.  
See if you can record them all.
2. Now pick four cards with a total of 12.  
How many different ways can you do it?
3. Can you pick five cards with a total of 12?
