

Choose the level that will give you a challenge.
Copy and solve each calculation in your maths book by
drawing the correct amount of groups.

Example

$$12 \div 3 = 4$$

If you are dividing larger numbers you may be able to
draw tens rather than ones.

$$18 \div 2 =$$

$$26 \div 2 =$$

$$28 \div 2 =$$

$$22 \div 2 =$$

$$32 \div 2 =$$

$$36 \div 2 =$$

$$30 \div 2 =$$

$$40 \div 2 =$$

$$80 \div 2 =$$

$$40 \div 2 =$$

$$30 \div 2 =$$

$$50 \div 2 =$$

$$90 \div 2 =$$

$$70 \div 2 =$$

$$86 \div 2 =$$

$$28 \div 2 =$$

$$16 \div 4 =$$

$$32 \div 4 =$$

$$18 \div 3 =$$

$$30 \div 5 =$$

$$33 \div 3 =$$

$$21 \div 3 =$$

$$40 \div 5 =$$

$$27 \div 5 =$$
