

Think together

1 Sort the animals into 2 groups. 

2 Is there **more than** one way to sort them?

I can see a different way!

See questions on timetable.

Encourage children to use mathematical vocabulary when sorting e. bigger/smaller, more, fewer, same, different.

Prompt children to look at colour pattern, shape and size.

Set up similar groups of objects (up to 5) If you don't have animals to sort at home you can print this sheet and cut out and sort the animals in the box.
