In 1588, Philip's Armada finally set sail. When the Armada anchored at Calais, the English used fireships to scatter the Spanish fleet and then attack it at the Battle of Gravelines in July 1588. The Armada was forced to abandon its invasion attempt and was destroyed by storms, which Philip I called the Protestant Wind, whilst trying to sail home round the north of Scotland. Queen Elizabeth had a portrait painted to publicise her 'famous victory'.
