

Maths

Wednesday 16th December

Look at the pictures below:

Think together

- 1 Put the pictures in order.

- 2 Describe what Alex does **after** school.

I will work out what Alex does first.

Use these words to help you: first, then, later.

1. Put these pictures in order. What comes first? How does the sun help you order these pictures?
2. Can you describe what is happening in Alex's day? Use the language related to time!

Use question prompts to support your child's understanding to help them discuss what happens in their day after school. *What happens first? What time of day is light, what time of day is dark? Which comes first? What do you do when it's dark outside? What do you do when it's light outside?*
