

- What can you see in the picture?
- What are the parts? How many cupcakes are there? How many doughnuts are there?
- How many cakes are there altogether? What is the whole?
- How many doughnuts will Aiden's toy get? How many cupcakes will Ella's toy get?

Now use objects from around the house to sort up to 5 objects practically – you might even be able to use cakes!

- Where is the whole? Where are the parts?
- What has happened to the whole in the second picture?
