

## Computing

This week we are learning about algorithms.

What is an algorithm? We use algorithms all the time without even realising it.

Take a look at this BBC Bitesize video for more information.

### Getting Dressed

You follow a step-by-step procedure to get dressed in your school uniform every morning.

For example:

1. Put on underwear and socks.
2. Put on trousers.
3. Put on shirt, followed by tie.
4. Put on jumper.
5. Put on shoes.

Algorithms need to be in the correct order.

What would happen if you put your shoes on before your socks?

Now try to write an algorithm for making a sandwich. Remember to think carefully about the order.
