

Add by Making 10 – Wednesday Introduction

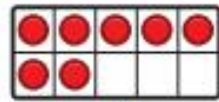

Share

a)

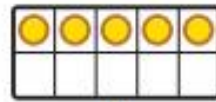

We need to work out $7 + 5$.

I **predict** the answer will be greater than 10. I will start by making 10.

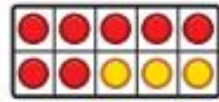

7

+

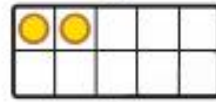

5

= ?

10

+

2

= 12

$$7 + 3 = 10$$

$$10 + 2 = 12$$

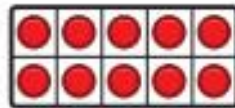

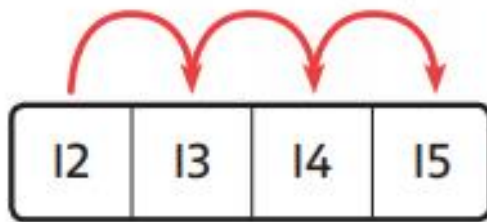

So

$$7 + 5 = 12$$

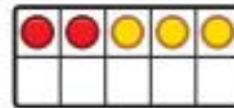

I will add 3 to make 7 up to 10.

The children found 12  altogether.

b) There are 3  hidden in the classroom.

$$12 + 3 = 15$$

There are 15  in total.

I think of it as $10 + 5$.
