## Think together

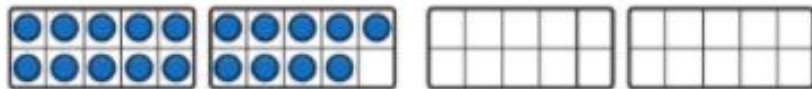

- 1 There are 16 on the tree.  
5 fall to the ground.  
How many are there left  
in the tree?

$$16 - 5 = \square$$

There are  left in the tree.

- 2 a) Work out  $19 - 6$ .      b) Work out  $16 - 4$ .

$$19 - 6 = \square$$

$$16 - 4 = \square$$

Use 1 for  
each .

Spicy/Hot

- 3 Work out the missing numbers in these  
number sentences.

a)  $7 - 5 = \square$

$$17 - 5 = \square$$

b)  $8 - 3 = \square$

$$\square - 3 = 15$$

c)  $7 - \square = 0$

$$\square - 7 = 10$$

I think I can use  
 $7 - 5$  to help me  
answer  $17 - 5$ . I  
wonder what does  
not change in  $17 - 5$ .

When is the  
answer to a  
question 0?
