4 have eggs.

$$15 - 4 = 11$$

11 do not have eggs.

b) 13 dive into the sea.

I can count back 13 from 15. This takes time and I often make mistakes.

$$15 - 10 = 5$$

$$5 - 3 = 2$$

So

$$15 - 13 = 2$$

There are 2 left on the ice.

I know that 13 is 10 and 3. I can subtract the 10 first and then 3.

Mild

Think together

There are 18 .

A penguin eats 12 .

How many are left?

Use 1 for each .

$$18 - 10 = \square$$

$$\square - 2 = \square$$

So

$$18 - 12 = \square$$

There are \square left.

Spicy 

2 Work out $19 - 14$.

$$19 - \square = \square$$

$$\square - \square = \square$$

So

$$19 - 14 = \square$$

3 What is $18 - 15$?

I subtracted 10 first and then 5.

Danny

I subtracted 5 first and then 10.

Tamsin

CHALLENGE 

Do Danny and Tamsin get the same answer?

Danny

$$18 - 10 = \square$$

$$\square - \square = \square$$

So

$$18 - 15 = \square$$

Tamsin

$$18 - 5 = \square$$

$$\square - \square = \square$$

So

$$18 - 15 = \square$$

Hot 

a) Work out $17 - 12$.

$$17 - \square = \square$$

$$\square - \square = \square$$

So

$$17 - 12 = \square$$

b) Work out $19 - 11$.

$$19 - \square = \square$$

$$\square - \square = \square$$

So

$$19 - 11 = \square$$

Complete these number sentences.

a) $7 - 6 = \square$

$$17 - 6 = \square$$

$$17 - 16 = \square$$

b) $9 - 5 = \square$

$$19 - 15 = \square$$

$$19 - 5 = \square$$
