Maths

L.o- To count up to 10

Watch the teaching video below to help complete the activity.

https://www.youtube.com/watch?v=dh_i9YK5uL0

Tens Frame

Get active

All of the objects you need are below. Cut them out and the group them first into balls, badges and buttons.

Using the tens frame, can you find out how many of each object there are?

Remember to count carefully, pointing to the pictures as you count them.

Can you fill up the top row of the tens frame first before filling the bottom row?

You can also use real objects to represent those if you are unable to print.

Make a set of number cards 1-10. Turn each one face down.

Using the pictures from the activity or other small objects make the number shown on the card when you turn it over in your tens frame.
