

Wednesday 19th January

Maths

L.o- To count different representations of up to 10

Before watching the teaching video below your child will need to have 10 small objects or counters and their tens frame from yesterday in front of them to join in with part of the activity.

Teaching video:

https://www.youtube.com/watch?v=iXJgP_uN8AI

Please find the follow up activity on the next page.

l.O- To represent 9 and 10 in my own way on a tens frame

Draw 9 flowers.

Show 10.

1

Mastery checkpoint for parents- ensure your child has drawn the right number of flowers and counters on the tens frame.

- Do they need to count one by one or are they beginning to subitise and use number bonds to make numbers more efficiently?
- Do they understand that 9 is one less than 10, so they will have one less in the ten frame and then 2 full rows?
- Can they spot 9 and 10 without counting?
